# ANNUAL

# REPORT

# 2023

# HIGHLIGHTS FROM 2023

## IN-STORE WALGREENS AWARENESS & FUNDRAISING CAMPAIGN

Danny Did partnered with Walgreens to raise awareness and funds in more than 200 Walgreens locations in greater Chicago, Wisconsin and Indiana.

## 14TH ANNUAL EVENING OF HEARTS & HUGS EVENT

Our annual gala achieved record-setting fundraising numbers. Staged from Theater on the Lake, supporters participated both in Chicago and by watching virtually from across the United States.

## CO-HOSTED 3RD ANNUAL DEVICE ACCELERATOR COURSE

In collaboration with the Epilepsy Foundation, we facilitated a six-week virtual course to provide resources and experts for five new epilepsy device companies.

## DIVERSITY RADIO CAMPAIGNS CHICAGO, LOS ANGELES, MILWAUKEE AND MINNEAPOLIS

## PARTNERS AGAINST MORTALITY IN EPILEPSY (PAME) CONFERENCE

Danny Did co-hosted a SOLD OUT meeting that was attended by more than 300 bereaved caregivers, healthcare professionals, researchers, and advocates to advance progress against mortality in epilepsy.

## NEW MASTERCLASS SUPPLIES SUDEP EDUCATION TO PROVIDERS WORLDWIDE

Danny Did partnered with Pretola Health for a new training course that educated community health workers across 51 low-and-middle income countries.

# MEET DANNY

---

Danny Did<sup>®</sup>  
FOUNDATION

Danny Stanton was born on March 2, 2005. Danny died on December 12, 2009.

A wonderfully normal two years of development followed his birth as Danny joined his sister Mary Grace and his brother Johnny and took his place as kid number three in the Stanton family. He was, as his grandma Murtaugh dubbed him, the “little toughie” of the family. The kid was a scrapper who held his own as he established his place within his family. Even at two years of age, he had established himself –somehow, and in many ways– as an equal not only in terms of experiencing life, but also as one who brought experience to the lives of everyone in his family. Soon, Danny was no longer the youngest Stanton, as his brother Tommy came along when Danny was two.

It was at age two when Danny had his first seizure. His eyes rolled back and he shook. We did not know what was happening. We dialed 911 then rushed him to our next-door neighbor, who is a paramedic. Danny seized for almost 10 minutes. On that night, we had a battery of tests done at Children’s Memorial Hospital in Chicago. There was no known reason or cause found for Danny’s seizure. No injury, no trigger. We were told that sometimes seizures in children have no known cause and that kids often outgrow them. The experience was terrifying.

We left the hospital that night without any written information about seizures or seizure disorders, sans any mention of epilepsy or epilepsy organizations, and sans anything short of the feeling that we had fallen into a hole that had no bottom. Sudden Unexpected Death In Epilepsy, of course, crossed no lips and fell upon no ears. Danny began sleeping in bed with us after that first seizure.

Danny had a second seizure while sleeping just over a month later. After this second seizure, he had an MRI. Again, no underlying cause was found for his seizures. Danny was then put on a variety of medicines to control the seizures, and regular electroencephalograms (EEGs) were scheduled and performed. His neurologist determined that Danny had childhood seizure disorder. Still no mention of epilepsy, still no suggestion of outreach to epilepsy organizations, and still, of course, no mention of Sudden Unexpected Death In Epilepsy. What we were told was this: he’ll outgrow it, many kids experience this, we don’t know why it happens, maybe it’s “his normal.” How might life be different had a sophisticated and tough-minded doctor sat us down and said “let me tell you something that will shock you but that I am mandated both by my profession and by my personal sense of duty to inform you of . . . your son has epilepsy, and along with this diagnosis comes a plethora of safety issues that you need to become aware of...”

Danny’s daily behavior was completely normal. He continued to be athletic, inquisitive, engaging, social, and, more than anything, affectionate. As we continued meeting with Danny’s neurologist for regular check-ups, we became more and more comfortable with the idea that we were doing all we could for Danny and that we were on a clear and well-defined path. We were told that a slightly abnormal EEG might just be Danny’s ‘normal.’

After sleeping with us for a half a year, Danny began to return to his own bed. On hundreds of occasions we left our bed to check on him. We caught him twice more having a seizure in his sleep. We informed our doctors of every event.

We continued to trust and believe that we were doing all that we could. Birthdays, holidays, block parties . . . each month brought more punch to us as a family, and each day brought hugs from Danny: he'd tuck his arms into his own chest and then wait for you to surround his body with yours. He'd then nestle his head under your chin, take a deep breath, and let his exhale say that he had found the spot.

After a year of no known seizures, Danny returned again to his own bed. And then as he turned four and had gone without a known seizure for 18 months, we thought that our course of action had been successful and that his neurologist was right: Danny would, through medicine and time, outgrow his 'seizure disorder.' It was like a rebirth for us and for Danny.

On Tuesday, December 8, 2009, we took Danny for a scheduled appointment with his neurologist. He had a one-hour EEG done while sleeping, and we met with his doctor afterward. There was still abnormal activity showing up, but maybe a lesser amount than the previous EEG showed. We increased Danny's dosage that day to accommodate a slight weight gain since his last visit.

Four days later, on December 12, 2009, we found Danny's lifeless body in his bed at 7:15 am.

How many seizures did Danny have that we did not catch? We will never know. One thing we do know are the last words to ever fall upon that little toughie's ears. They are the words whispered by his mom to Danny each and every night as she put him to bed: "I love you, sweet boy." These words were always followed by three kisses: one to the forehead, one to the nose, and one to the lips. I love you, sweet boy.

Now life continues –in many respects– albeit without the soft bounce of one little boy's feet upon the dirt of the Earth. Our Danny boy has entered a new phase, part of which is in the form of his organization, the Danny Did Foundation, which derives from the last line of Danny's obituary: **Please go and enjoy your life. Danny did.**

# Letter from the DDF Co- Founders

Imperfectly, our son Danny had epilepsy. Tragically, our son Danny died from epilepsy. Specifically, Danny died from Sudden Unexpected Death in Epilepsy, also known as SUDEP. Graphically, Mariann found Danny dead in his bed one cold December morning two weeks before Christmas in 2009. Horrifically, we tried to resuscitate Danny that morning in front of his sister Mary Grace and his two brothers, Johnny and Tommy. Distressingly, we believed that we had been doing everything possible to care for Danny.

Through two years of treatment by medical professionals, we were never informed that Danny had epilepsy, and even though Danny suffered from seizures we were never informed that Danny could die from one of his seizures. We were never told about SUDEP. We were never given information about organizations that could educate and support us as we swirled through Danny's seizure episodes.

And so when Danny died, we knew that he and that we had been robbed of the opportunities of a lifetime. An actual lifetime. And we were furious. And we asked each other in our bedroom on that morning in December – after we had returned home from the hospital where Danny's body had grown cold atop of ours as we laid with him - we asked ourselves, "how could this happen?"

Part of our answer to that question has been the formation of the Danny Did Foundation, which we are nurturing and developing as if it were part of Danny himself, and together with so many other individuals and organizations, we are changing the perception of epilepsy and the outlook for those afflicted by epilepsy.

And so as one year closes and another begins, we look forward to new partnerships and to new alliances as we continue our work to enable access to seizure monitoring and detecting devices for families who cannot afford them, and to advance awareness of epilepsy and the risks that accompany it, including Sudden Unexpected Death in Epilepsy. Thank you for your participation and for helping to prevent another death caused by a seizure.

*Mariann and Mike Stanton*

## Letter from the DDF President

The year 2023 continued progress and excitement at Danny Did. We launched new and innovative awareness programs - including our first Spanish-language campaign - continuing our relentless drumbeat of epilepsy and SUDEP education for the general public. We also partnered with Pretola Health to provide a SUDEP education course that reached healthcare providers across 51 low-and-middle income countries.

This year, my nephew Danny would have been a college freshman, experiencing a time of excitement when his curiosity, talents and friendships would have expanded with the passing of another school year. Epilepsy impacts 1 in 26 Americans, and is second only to stroke among neurological disorders in Years of Potential Life Lost (YPLL). Each family who has lost a loved one to epilepsy knows how painful those lost years can be. The communication between medical professionals and their patients about risk of SUDEP, while improving, remains unacceptably low.

As we look back at the past 12 months, what makes us most proud is that our support for families in need has extended to all 50 states and 17 countries, support that many have described as life altering. As we grow and reach people and communities in need, we both appreciate and call for your continued partnership. We are excited and inspired to drive more progress.

With hope and gratitude,

*Tom Stanton*

# Mission

To advance awareness of epilepsy and Sudden Unexpected Death in Epilepsy (SUDEP), protect people with epilepsy, and prevent deaths caused by seizures.

# Vision

To create a reality in which healthcare providers openly communicate SUDEP and all mortality-related risks with their patients or caregivers.

To elevate awareness of, and access to, technologies that provide early intervention and added safety when a seizure occurs.

# Values

Family Love: Everything we do is in service of families;

Preparation: We help families prepare to protect their loved ones;

Hope: We hold hope for a brighter future;

Enjoyment of Life: Our work is meant to carry forward and spread Danny's joy for life.

# ABOUT EPILEPSY

A seizure is a sudden behavioral change resulting from excessive electrical activity in the brain. Seizures may be provoked (also known as acute symptomatic; for example, a fever in a young child, drug intoxication or withdrawal, electrolyte imbalance) or unprovoked, resulting from a genetic, developmental, acquired (for example, head trauma, tumor, stroke), or an unknown cause.

When a person has two or more unprovoked seizures, they have epilepsy. An estimated 3.4 million Americans have active epilepsy, with up to 200,000 new cases diagnosed in the United States each year. Approximately 1 in 26 people will develop epilepsy at some point in their lives, and the onset of epilepsy is highest in children and older adults. Epilepsy impacts 65 million people worldwide and is a spectrum that spans more than 40 syndromes. Despite all available treatments, 30 to 40 percent of people with epilepsy continue to experience uncontrolled seizures. In two-thirds of patients diagnosed with epilepsy, the cause is unknown.

A report from the Centers for Disease Control and Prevention (CDC) indicates that the number of Americans with epilepsy is higher than ever. Epilepsy affects more people than multiple sclerosis, cerebral palsy, muscular dystrophy, and Parkinson's combined – yet receives fewer federal dollars per patient than each of these. According to advocate group Citizens United for Research in Epilepsy, epilepsy costs the United States approximately \$15.5 billion each year. The indirect costs associated with uncontrolled seizures are seven times higher than that of the average for all chronic diseases.

# ABOUT SUDEP

Seizures can sometimes be fatal from a range of causes, and no matter how the death is defined, every time it is a huge loss. There are numerous ways that a person can die stemming from seizure activity – drowning, an accident, head trauma, suicide, or status epilepticus. Another category of epilepsy mortality is Sudden Unexpected Death in Epilepsy, or SUDEP. SUDEP is the most common category of death in epilepsy. SUDEP is just that: sudden and unexpected. The most recent research shows that a case of SUDEP occurs in 1 in 1,000 people with controlled epilepsy, and for 1 out of 150 people with uncontrolled epilepsy.

The Danny Did Foundation pledges to shine a light on SUDEP for as long as is necessary to achieve major progress in awareness and in the advancement of preventative measures.

## WHAT DEFINES A CASE OF SUDEP?

SUDEP is not a cause of death but rather a category of death. A death is referred to as SUDEP when a seemingly healthy person with epilepsy dies unexpectedly and no clear reason for the death can be determined. In most cases, an autopsy is required to rule out other causes of death. The most common criteria used to determine whether a death is due to SUDEP are:

- The person has epilepsy, which is defined as recurrent unprovoked seizures.
- The person died unexpectedly while in a reasonable state of health.
- The death occurred suddenly and during normal activity (often during sleep).
- An obvious medical cause of death could not be determined at autopsy.
- The death was not the direct result of status epilepticus.

Our practical impact is to provide seizure alert devices for families in need. These systems provide added safety for patients, and enhanced peace of mind for caregivers.

# STORIES OF IMPACT

# FAMILIES **STORIES OF IMPACT**

## Thompson Family, Ohio

"Our family would like to thank everyone at the Danny Did Foundation from the bottom of our hearts for what you do to help children who have epilepsy. I could never express how much it means to us. This diagnosis has turned our world upside down, and we have experienced some of the darkest days of our lives. Our sweet girl has been through so much, but now she can finally get back to her own bed and we can all have some peace of mind. You guys have been such a blessing to us during this difficult time. Hopefully one day we will be able to give back to the Danny Did Foundation. We will never forget what Danny Did Foundation did for us, and we will be sure to tell everyone!"

## Smith Family, Florida

"The DDF sponsored my son for a Sami device grant. It has been nearly one month of use and I am blown away! Previously it was a guessing game of, "Did he have a seizure last night?" We just met with his neurologist yesterday and it made the appointment so much better. We have clear video down to the seconds of his seizure from beginning to end to show our doctor. He appreciated it as well since having this can help him with his care plan for my son. The generosity of the DDF has been a lifesaver for our family. I am positive that future families who receive help will feel the same way. Please never give up and continue the good fight against Epilepsy and the awareness it needs."

## Beisel Family, Texas

"Thank you again for helping us keep Nora Safe!! Epilepsy was never on our radar- especially in TWO of our 5 kiddos... we are so grateful for organizations like yours who are working hard to educate families and keep our loved ones safe."

# DOCTORS **STORIES OF IMPACT**

---

## **Pediatric Neurologist, New Jersey**

I am a doctor who attended the SUDEP symposium that Danny Did Foundation was a partner to with the Child Neurology Foundation. Listening to the speakers there completely changed the way that I talk with my patients about the risk of sudden death, and I now understand the importance of having the conversation with EVERY family. Since adjusting my communication on this topic, I have noticed an unexpected benefit: my patients are more compliant with their medications and more open about breakthrough seizures. I wish I had thought of this sooner! I have been using the materials provided at the symposium, and I will be ordering more soon.

## **Medical School Student, Illinois**

I loved this presentation. I thought that the parents of children with epilepsy telling us what they wish their doctors would have told them, such as education on sudep and referring to resources such as Danny Did, and giving us actionable items that we can do as future physicians was incredibly helpful.

# OUR PEOPLE —

Danny Did<sup>®</sup>  
FOUNDATION

Mike Stanton,  
Co-Founder

Mariann grew up near Chicago's south side in Oak Lawn, Illinois. Mariann attended Mother McCauley high school, where she was a star basketball player before going on to Loyola University as a four-year scholarship basketball player. She earned a degree in English from Loyola and then went on to earn a Master's degree in Education from DePaul University. Mariann is a high school teacher in Chicago.

Mariann Stanton,  
Co-Founder

**Tom Stanton**  
**President**

Tom became Danny Did's founding executive director in 2010. He remembers many endless summer days and nights playing with Danny and his siblings on Leona Avenue. Tom leads the communications and fundraising efforts for Danny Did, and works to expand their collaborations and impact in the larger epilepsy community. Tom holds a journalism degree from the University of Dayton, and a master's degree in Public Policy from DePaul University. More than anything, Tom gained happiness from the love Danny gave by way of lots of hugs. He is thankful to have the chance to keep Danny's spirit alive through service to Danny Did.

Mary has been a part of the DDF staff since 2010. However, her relationship with Danny's family began when her young sons, Brenden and Charlie, spent years playing sports with the Stanton children. Mary leads Danny Did's efforts with family support, event planning, and volunteer coordination. She earned her Bachelor's of Science at Northern Illinois University and her Master's in Human Resources at Loyola University in Chicago. Mary considers it an honor to serve at Danny Did, and the Stanton family is most grateful not only for her friendship, but also for the wonderful buddy that Charlie was to Danny.

**Mary Duffy**  
**Executive Director**

**Katie Gaughan**  
**Programs Manager**

As the Danny Did Programs Manager, Katie has the role to make a direct impact on families who reach out in need. Her career has included time as a paramedic, where she gained experience in treating those who had suffered a seizure.

Prior to working at Danny Did, Katie was a long-time volunteer for the organization, and she serves on its Associate Board. As a former neighbor to the Stantons, she held a special friendship with Danny.

Brenden is a long-time friend of the Danny Did Foundation. His desire to serve those facing epilepsy stems from his friendship with Danny during their childhood. His diverse talents and responsibilities support operations and programs and smooth the path for more epilepsy families to receive the support that they need.

**Brenden Duffy**  
**Executive Assistant**

# DANNY DID 2023 BOARD OF DIRECTORS

**JULIE DIX**

Julie is a media sales executive and her career path has featured sustained success at some Chicago's largest radio stations. She is currently an executive at Prime Time Media, where she utilizes her experience and relationships to connect the Danny Did Foundation with a variety of awareness platforms and opportunities. Julie is a graduate of Purdue University, and lives in Wilmette, IL with her husband and their children.

**LYNN HANLEY**

Lynn is an attorney specializing in commercial real estate development, land use and zoning. Lynn has also taught real estate and zoning classes at the University of Richmond Law School and the Loyola University of Chicago Law School. She holds a BA from Miami University, an MA from Xavier University and a JD from Loyola University of Chicago. She and her family live in Winnetka, IL.

**TRACY JABLONSKI**

When the eldest daughter of Tracy and Brian Jablonski was diagnosed with epilepsy and a brain tumor in 2015, they learned about the Danny Did Foundation. She has since become an advocate to spread awareness about epilepsy, SUDEP, and the technologies available. Tracy is a graduate of St. Francis University. She and her family live in LaGrange, IL.

**DR. REBECCA GARCIA-SOSA**

Dr. Garcia-Sosa is an Attending Physician in and the Epilepsy Center at Ann & Robert H. Lurie Children's Hospital of Chicago, and Assistant Professor of Pediatrics (Neurology), Northwestern University Feinberg School of Medicine. She represents Danny Did for educational speaking engagements at with medical students, family events and medical conferences. She is a native of Puerto Rico.

**JENNIFER STONER**

Jen is a mother, a senior marketing professional, and the past Co-President of our Danny Did Foundation Associate Board. She uses her experiences as a person living with epilepsy to advocate for campaigns and policies that combat the stigma of seizures. A Massachusetts native, she now lives in Greater Chicago with her husband and children.

## DOUG BRUNO - EMERITUS

Doug Bruno has more than 700 career victories as head coach of DePaul University's Women's basketball. In addition, as a coach for USA Basketball, he coached two different teams to Olympic Gold Medals. Doug was a founding board member for the Danny Did Foundation. He now serves as a member of our Emeritus Board. His family knows the challenges of epilepsy.

## JOSH GABBY - TREASURER

Josh is a data analytics executive for JPMorgan Chase. His support for Danny Did includes strategy planning, marketing expertise and service as our DDF board treasurer. He holds an MBA from Northwestern University's Kellogg School of Management.

## DIANE GARVEY-SECRETARY

Diane has hosted several fundraising events for Danny Did, with several featuring her role as a Zumba dance instructor. This year she completed a 26.2-mile swim-a-thon in her North Carolina community to benefit kids who face epilepsy.

## JOHN WRENN

John owns and operates several Chicago area businesses, including Theater on the Lake, a premier dining and event space located on Chicago's lakefront in Lincoln Park. He is active in all forms of philanthropy and specializes in fundraising and development.

## KARI HEIDEMAN

Kari is a family nurse practitioner who brings a valuable healthcare provider perspective to the Danny Did board. She has also served as Co-Chair of our annual Hearts & Hugs gala, and is a repeat member of Team Danny Did.

## MIKE STANTON - CO-FOUNDER

With his wife Mariann, Mike is the co-founder of the Danny Did Foundation. His vision for keeping Danny's spirit alive in the world through the work of the foundation is a guiding light. He is a repeat member of Team Danny Did. He does regular public speaking engagements on behalf of the foundation.

## KATIE ONSAGER

Katie Prentiss Onsager is a Chicago-based documentary filmmaker and video journalist, specializing in producing and editing. As the Executive Producer of Small Forces, she led the production of more than 40 documentary shorts about grassroots activists and organizations across the country. Katie was a founding member of Danny Did's Associate Board, and served as the co-president from 2015-2021

## CAROLINE MCATEER - VICE PRESIDENT

Caroline has worked at DePaul University for over 20 years and is currently a Director of Development in the Office of Advancement. Caroline was diagnosed with epilepsy when she was a teenager. Her personal experience has led to her desire to raise awareness of epilepsy. She holds a BA from the University of Dayton and an MS from DePaul University. She and her family live in Chicago.

## JEANINE MCSHEA

Jeanine has spent 25 years in the real estate industry, both as a broker and an executive. With her daughter Erin McShea, she oversees The McShea Group at @properties. Jeanine is mother to two adult children with epilepsy, both who serve on the Danny Did Young Professionals board. She holds a bachelor's degree from Winona State University, and lives in Chicago with her family.

## JENNIFER SIME

Jennifer is a mother, wife and registered nurse in Decorah, IA. She advocates in honor of her son Brendan, who died from SUDEP in 2017 at age 19. Among her many forms of advocacy, she has run multiple marathons as a member of Team Danny Did.

## KURT FLORIAN-PRESIDENT

Kurt is a lawyer and a past executive director for the Epilepsy Foundation of Greater Chicago. He advocates in honor of his adult daughter, and the many families he has supported over the years. He and his wife Linda live in Wheaton, IL.

## SCOT GILLESPIE

Scot is an Executive Vice President and GM in the Commerce Cloud division of Salesforce. He holds an undergraduate degree from National Louis University, and an MBA from Northwestern University's Kellogg School of Management. Scot and his wife live in Woodstock, Illinois.

# DANNY DID ASSOCIATE BOARD

Our Danny Did Associate Board integrates young professionals into the varied programs and campaigns of the Danny Did Foundation. Through volunteer activities, social and fundraising events and networking opportunities, this Board encourages the next generation of leaders to engage in our mission to prevent deaths caused by seizures.
